EDUCATION

Masters in information systems, Auburn University at Montgomery (GPA:3.6)

July 2023 – May 2025

Bachelor in Bachelor of Computer Application Vignan University

July 2017-May 2020

PROFESSIONAL SUMMARY

Detail-oriented and proactive Software Engineer with 2+ years of hands-on experience in providing technical support for Cloud-based platforms and Laboratory Information Management Systems (LIMS). Proficient in Java, Spring Framework, MySQL, AWS, and Kubernetes, with a strong background in troubleshooting, root cause analysis, and technical documentation. Skilled in problem-solving under pressure, supporting production environments, and streamlining processes for operational efficiency. Adept at collaborating with cross-functional teams to resolve technical issues and implement improvements in fast-paced, regulated environments.

TECHNICAL SKILLS

Languages	Java (JDK17+), JavaScript, Python (basic)
Frontend	Angular, HTML, CSS
Backend	Spring Boot 3, REST APIs, Microservices, Hibernate, J2EE
Databases	Microsoft SQL Server, MySQL, PostgreSQL
DevOps & Tools	Git, Docker, Kubernetes, Azure DevOps, Jenkins
Testing	JUnit, Mockito, Postman
Cloud Platforms	AWS, Azure (basic proficiency)
Other	Agile, Scrum, Jira, CI/CD Pipelines, SOLID Principles

EXPERIENCE

Software Engineer

Oct 2021– Jul 2023

LTIMindtree Private Limited

Bangalore, India

- Provided end-to-end technical support for Laboratory Information Management Systems (LIMS) and cloud-based data analytics platforms ensuring system uptime and operational continuity.
- Performed root cause analysis and debugging using log file analysis, system instrumentation, and environment replication to resolve complex production and research-related incidents.
- Supported cloud infrastructure on AWS and Kubernetes for deployment, scaling, and monitoring of LIMS components and data pipelines.
- Designed and maintained manifests for cloud pipeline executions fulfilling research and operational requests, ensuring timely and accurate delivery of data to stakeholders.
- Developed and maintained technical documentation detailing problem resolution steps, best practices, and standard operating procedures to streamline issue resolution.
- Coordinated with research teams to analyze requirements, validate pipeline results, and optimize process flows supporting large-scale data analytics tasks.
- Implemented automation scripts using Groovy and Python to reduce manual intervention in recurring production tasks.
- Conducted knowledge transfer sessions and peer training on debugging techniques, cloud resource management, and application performance optimization.
- Ensured HIPAA/PHI compliance by maintaining secure data access protocols and completing all mandated security training programs.
- Participated in after-hours support rotations, providing critical system monitoring and incident response during non-traditional work hours.

CERTIFICATIONS

- Go Java Full Stack with Spring Boot and Angular – 2025
- Secure Delivery for Cloud-Native Java Backend Developers – Security Innovation / Mindtree
- Secure Delivery for Java Developers – Security Innovation / Mindtree
- AWS Cloud Practitioner — In Progress
- Azure Fundamentals — In Progress
