EDUCATION

Auburn University at Montgomery | Montgomery, AL

Expected May 2025

Master's in information system | GPA: 3.53/4

Vignan University | Vadlamudi, India

July 2017 - May 2020

Undergraduate in Bachelor of Computer Application | GPA: 8.94/10

PROFESSIONAL SUMMARY

Detail-oriented and passionate Java Developer with experience in Java, JavaScript, and related technologies. Strong understanding of object-oriented programming, software development life cycle, and database management. Adept at developing secure, scalable, and maintainable applications using Java 8+, Spring, SQL, and front-end frameworks such as Angular and React. Seeking an opportunity to contribute to innovative projects and grow as a full-stack developer.

TECHNICAL SKILLS

- **Programming Languages:** Java (Java 8+), JavaScript, HTML5 and CSS
- **Frameworks & Libraries:** Spring Boot, Microservices, REST APIs.
- **Database Management:** MySQL, PostgreSQL.
- **DevOps & Tools:** Docker, Git, CI/CD
- **Concurrency & System Design:** Multithreading, distributed systems
- **Testing & Performance:** JUnit, TestNG
- **Version Control & Project Management:** Git, GitHub
- **Software Development Concepts:** OOP, Data Structures (Collections, Maps, Lists, Sets), Agile Methodologies, CI/CD, Testing Automation

EXPERIENCE

LTIMindtree | Software engineer | Bangalore, India

Oct 2020 – July 2023

- Developed and maintained applications using Java 8+, Spring Boot, React.js, and Angular 2+.
- Wrote scalable, secure, and maintainable code to support client platforms.
- Designed and executed automated system tests, ensuring software reliability and performance.
- Collaborated with testers to analyze and resolve defects in a timely manner.
- Researched new technologies to improve application performance and security.
- Worked closely with cross-functional teams to achieve sprint and user story goals.

PROJECTS

Client: Delta Air Lines | December 2020 – October 2021

- Developed enterprise-grade applications using Java, Spring Boot, and Hibernate, resulting in improved transactional performance and reliability.
- Designed scalable RESTful APIs for internal and third-party integrations, improving interoperability across platforms.
- Implemented robust authentication and authorization using Spring Security and JWT.
- Collaborated with DevOps teams to configure CI/CD pipelines using Jenkins and GitHub Actions.
- Conducted unit testing with JUnit and Mockito, achieving over 85% test coverage.
- Diagnosed and resolved production issues by monitoring logs and using tools like Splunk and Azure Monitor.
- Designed and implemented caching mechanisms using Redis to reduce latency and database load.
- Led migration of legacy modules to microservices architecture, improving maintainability and deployment cycles.
- Mentored junior developers in Java best practices and clean code principles.
- Actively participated in Agile ceremonies and worked closely with product owners to gather requirements and refine user stories.

Client: Sabre | Duration: November 2021– 2023

- Developed and maintained scalable microservices using **Java** and **Spring Boot**, significantly enhancing system performance and maintainability.
- Designed and implemented robust **RESTful APIs** to enable seamless communication across distributed services.
- Created and maintained **CI/CD pipelines** in **Azure DevOps** using **YAML**, streamlining build, test, and deployment workflows.
- Integrated automated testing frameworks into pipelines, ensuring continuous delivery with minimal manual intervention.
- Delivered production support by analyzing real-time application logs and proactively resolving issues in Azure environments.
- Engineered complete application modules based on evolving business requirements, following clean code principles and design patterns.
- Optimized **key-value storage systems** to accelerate **model inference** and support scalable AI-driven features.
- Built and supported infrastructure components for **Generative AI** features, ensuring reliability and performance at scale.
- Led rapid prototyping efforts for new features using emerging **Generative AI technologies**.
- Conducted peer code reviews, offering constructive feedback to maintain high code quality and alignment with best practices.
- Maintained and updated technical documentation in alignment with product enhancements and user feedback.

SOFT SKILLS

- Strategic Thinking & Problem Solving
- Team Collaboration & Mentorship
- Adaptability & Continuous Learning
- Strong Communication & Leadership

CERTIFICATIONS

- Secure Delivery for Cloud Native Java Backend Developers | Security Innovation by Mindtree.
- Secure Delivery for Java Developers Learning Path | Security Innovation by Mindtree.
