Dear Hiring Manager,

I am writing to express my interest in the Java Backend Developer position at Your Company. I have professional experience as an Associate Software Engineer at LTI Mindtree, where I was actively involved in developing Java-based applications using Core Java, Spring Boot, and RESTful APIs.

In my role, I contributed to building scalable backend solutions, working with microservices architecture, and managing data using MySQL. I also performed API testing and debugging using Postman, ensuring stable and efficient integrations. While my primary focus is backend development, I have working knowledge of HTML and CSS, which allows me to collaborate effectively with frontend teams when needed.

I thrive in Agile environments and have been part of sprint planning, daily stand-ups, and collaborative development cycles. I take pride in writing clean, maintainable code and constantly seek opportunities to optimize performance and adopt best practices.

I am eager to bring my skills and passion for backend development to a forward-thinking team like yours. I would welcome the opportunity to further discuss how my experience and drive can contribute to your ongoing projects.

Thank you for considering my application.

Sincerely,
Ganesh
